Kevin Katzer

Software Engineer

Blumenau, Santa Catarina, Brazil

Summary

Full Stack Developer with over 6 years of experience, specializing in scalable web applications with a focus on Micro-Frontends, React, TypeScript, Node.js, and NestJS. Proven success in startup environments, delivering high-performance solutions using GraphQL, AWS, and Kafka. Skilled at bridging technology and business needs to drive sustainable and efficient growth.

Experience

Flash

Software Engineer

November 2022 - Present (2 years 8 months)

São Paulo, São Paulo, Brazil

I work on a modular HR platform using a Micro-Frontend architecture (Single-SPA). I'm responsible for the recruitment and offboarding module, covering the full candidate lifecycle.

On the frontend, we use React, TypeScript, TRPC, GraphQL, and BFF patterns, with AWS for scalability and security.

On the backend, I develop microservices with Node.js and NestJS, using MongoDB as our database and Kafka for inter-service communication.

Contractor

Software Engineer

November 2021 - November 2022 (1 year 1 month)

United States

Worked on MVP development for two web applications in the Real Estate and Cosmetics industries, using the React ecosystem and industry best practices. Played a key role in both technical and business decisions to align with investor goals.

Developed a hybrid web app with React, TypeScript, and Ionic Framework, integrating AWS services (including AWS Cognito for auth) and various third-party APIs.

Stefanini Brasil

Software Engineer

May 2021 - November 2021 (7 months)

Blumenau, Santa Catarina, Brasil

Contributed to the development and maintenance of an internal sales web application at Dell using React.js, TypeScript, Redux, and .NET Core (REST & GraphQL APIs). Followed Agile Scrum practices and collaborated cross-functionally to deliver features aligned with business goals.

Emphasized code quality through Test-Driven Development (TDD), using Jest and React Testing Library for frontend tests, Cypress for E2E testing, and XUnit on the backend.

Benner

Software Engineer

August 2020 - May 2021 (10 months)

Blumenau, Santa Catarina, Brasil

Worked on an internal logistics tool, developing new features using .NET Core for the backend and PostgreSQL as the database. On the frontend, contributed to both custom Vue.js components and internal tools for CRUD interfaces.

Custom IT Sistemas

Software Engineer

May 2019 - August 2020 (1 year 4 months)

Blumenau, Santa Catarina, Brasil

Developed and maintained custom web applications for various clients, handling new features, project setup, bug fixes, and ongoing support. Most projects were built with .NET Framework or .NET Core on the backend, using jQuery and occasionally Vue.js on the frontend. Databases were primarily MySQL or SQL Server.

WorkDB Data Business

Software Engineer

April 2018 - July 2018 (4 months)

Blumenau, Santa Catarina, Brasil

Focused on developing chatbots to support web platforms by integrating public AI APIs into applications built with the Django framework in Python.
